

EASY DECK EDITOR

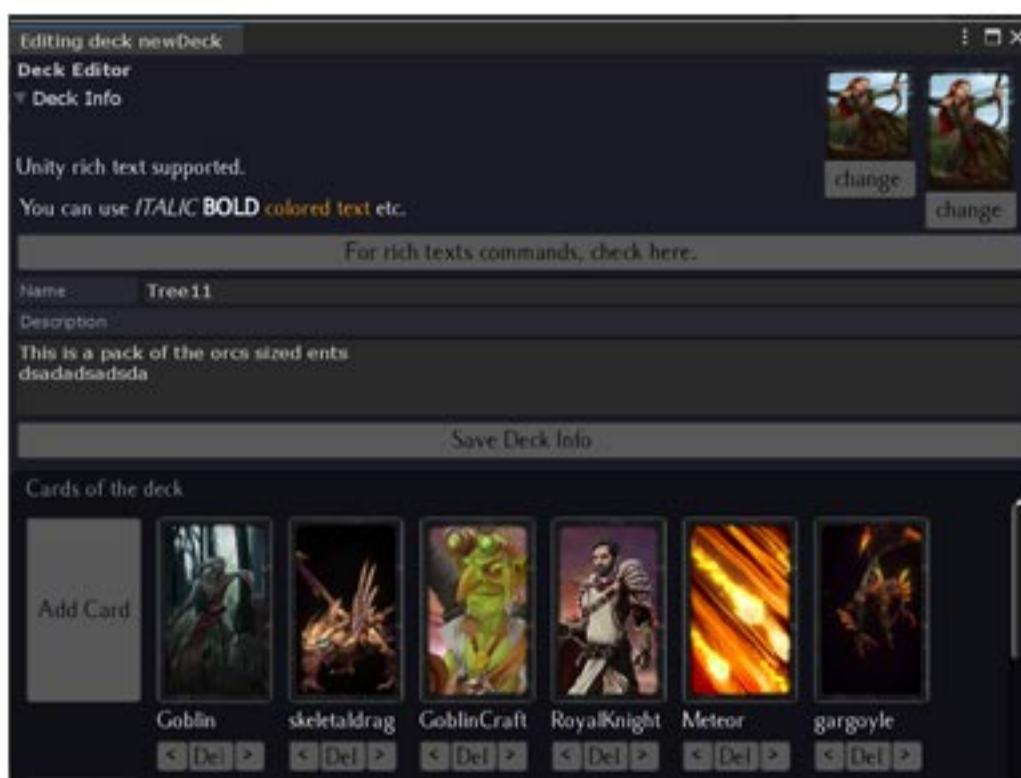

added at v1.5

Easy Deck Editor (EDE) will help you to create decks. Each user should select a deck before joining a game. If you play against AI will select the deck randomly.

There is no minimum or maximum card limit in a deck. Assume that we have 11 cards per round in game settings, but the selected deck has 5, then the system will pick those 5, and the rest will be generated randomly.

You can add/remove decks by using this editor. They will be placed in in-game deck menu automatically.

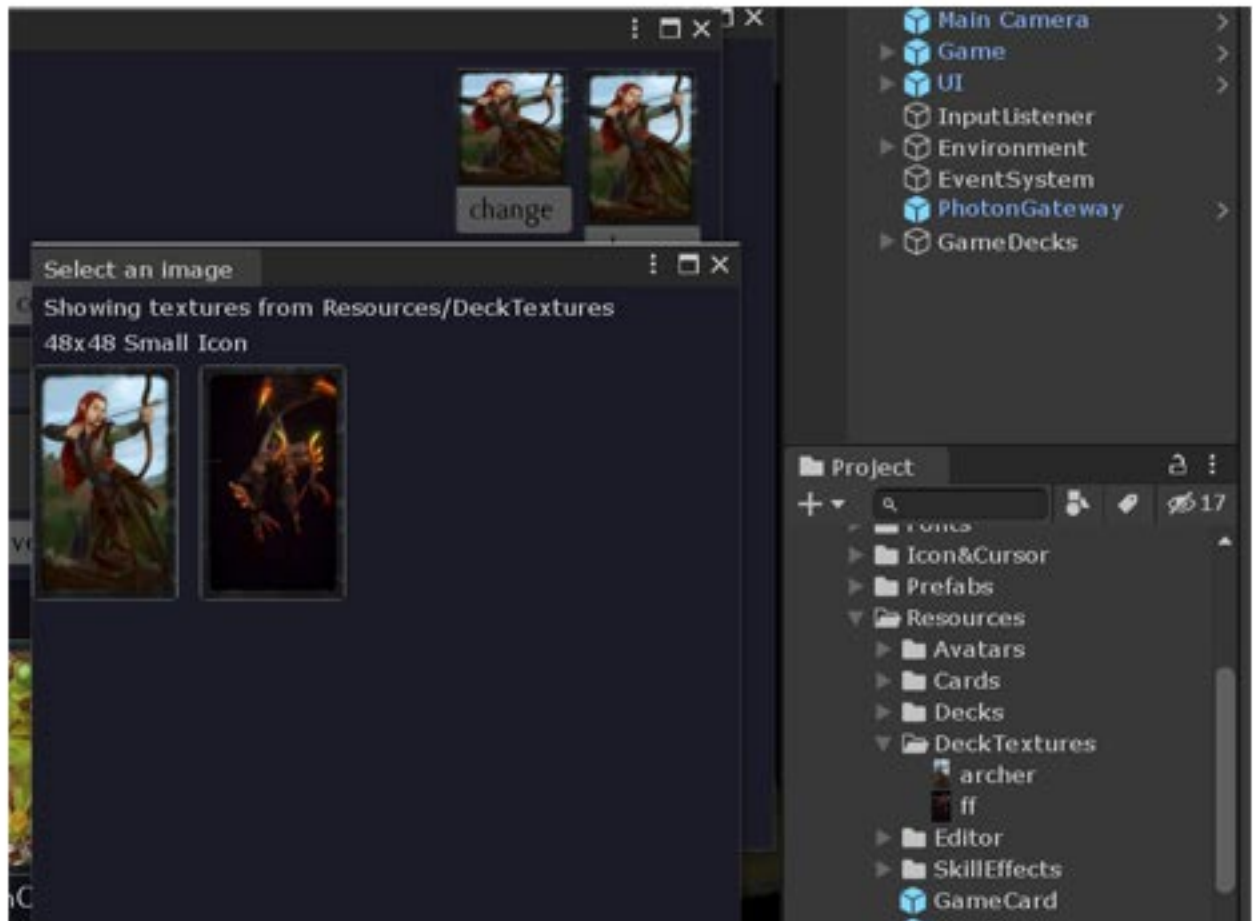

Every deck need a small & big icon for in-game menu.
Videos are also supported as animated image.

Put your images & videos to Resources/DeckTextures folder to use them in deck editor.

Preferred Small Image Size: 48x48px

Preferred Big Image Size: 220x400px

- A) Scrollable Deck List
- B) Deck Name
- C) Deck Description
- D) Cards of the deck
